Current Objective:

Layout, print design, and design for print production

My Toolbox:

- Mac OSX (I currently run OS X 10.4.9 on my home machine).
- Adobe Creative Suite Series, Including CS3, CS2, and CS, as well as the generation just before those. I have extensive experience with InDesign and Illustrator as strong skills in Photoshop, which I am always looking to strengthen.
- QuarkXPress, versions 4 through 7.
- OpenOffice.org (the open-source version of MSWord) and NeoOffice (the Mac version of OpenOffice.org)
- Adobe Dreamweaver MX 2004, CS3
- Some experience with Adobe Flash CS3. Always looking for more.

Some Things I've Been Caught Doing:

- Associate editor at Quark vs InDesign (<http://quarkvsindesign.com>) and Designorati (<http://designorati.com>), two sites serving the design community. I have written commentary, how-to's, reviews, and sometimes the odd and funny article.
- Designer and layouter of *The Columbia Overlook*, the quarterly news publication of the Columbia Group, Oregon Chapter of the Sierra Club.
- Technical Editor of two books by Pariah S. Burke: *Adobe Illustrator CS2 @ Work* (ISBN 978-0672328015), published by Sam's (how ironic, no?), and *Mastering InDesign CS3* (ISBN 978-0470114568) soon to be released by Wiley.
- I independently explore design (and whatever other issue strike my fancy) on my blog The Zehnkatzen Times (<http://zehnkatzen.blogspot.com>)

I Resemble This Remark:

- "I like your style"
-Victor Ives, Portland TV and Radio Legend,
in a recent email to me
